Card Expiration*: Month Year Cardholder Name*:
CVV Code*:

Billing Address is the same as given in the Contact Information

Step 4: Select Extra Services

In the next section, you can choose Extra Services Siteground provides for your Blog. I would personally recommend you to buy the Domain Privacy to protect your personal information. However, these are all extra services and you will be fine without choosing any of them.

Please make sure that if you are registering a new Domain, that the first tick box “Domain Registration” is ticked off.

- > if applicable select Extra Services
- > Confirm to Sitegrounds Terms of Services
- > Press Pay Now
- > check your Emails to activate your Account and check your billing information
- > Log in to your new Siteground Account here!

★ **Extra Services**

<input checked="" type="checkbox"/> Domain Registration	13.95€ Excl. VAT
	The domain name you've chosen becomes your property once registered. We will directly point it to your new hosting account as soon as it gets activated.
<input checked="" type="checkbox"/> Domain Privacy	11.70 €/year Excl. VAT (Regular: 23.40 €/year)
	By registering a domain name, your personal information becomes publicly available through the whois services. To protect it, use Domain Privacy.
<input type="checkbox"/> SG Site Scanner	18.60 €/year Excl. VAT
	SG Site Scanner is a monitoring service that checks your website daily and immediately notifies you if your website has been hacked or injected with malicious code.

3. WordPress

Step 5: Set up WordPress

Yey, we have successfully set up 2 out of our 3 Blog Pillars - your Domain and your Hosting! Now we need to install our Content Management System (CMS). There are two ways to install WordPress as your new CMS for your Blog.

5a) Option 1 (recommended): Open up the Support Chat and let Siteground set up WordPress with you.

- > Log in to your New Siteground Account
- > Head to Support in the Menu
- > Scroll all the way down to “Request Assistance from our Team”
- > Click the Link “here”
- > Select WordPress Assistance
- > Type in a few Words
- > Press Continue
- > Scroll all the way down
- > Choose Recommended Support Channel
- > Choose Post to Chat
- > Ask the person to help you with the WordPress installation

5b) Option 2: Use the WordPress Auto Installer

- > Log in to your New Siteground Account
- > Head to my Accounts in the Menu
- > Click cPanel
- > Click Wordpress in the Autoinstaller Section
- > Press the blue Install Button
- > Fill out all the required Information
- > Press install
- > In a new Browser window, type in your new domain and add /wp-login at the end to your URL e.g. (https://YourNewDomainName.com/wp-login)
- > Press Enter
- > Use your new Username and Password to log into Wordpress and your Blog

The screenshot displays the SiteGround Auto Installer interface. At the top, the SiteGround logo is on the left, and a user profile for 'Katie Grazer' is on the right with links for 'Switch To Affiliate Area', 'My Details', and 'Logout'. Below this is a navigation menu with 'Home', 'My Accounts', 'Support', 'Billing', 'Referral Deals', 'Add Services', and 'Perks'. A banner for 'Softaculous' is visible, along with various icons including cPanel, a star, a folder, a clipboard, a wrench, a document, a refresh, and a question mark. Below the banner, there's a section for 'Scripts' with options for 'PHP', 'JavaScripts', and 'PERL'. A search bar and a 'Welcome' message for 'whatska1' are also present. The main content area features a list of application categories on the left, such as 'Blogs', 'Micro Blogs', 'Portals/CMS', 'Forums', 'Image Galleries', 'Wikis', 'Social Networking', 'Ad Management', 'Calendars', 'Gaming', 'Mails', 'Polls and Analytics', 'Project Management', 'E-Commerce', and 'ERP'. The 'WordPress' application is highlighted, showing its logo, a 5-star rating, version '5.0.2', and release date '19-12-2018'. Below this, there's a navigation bar with 'Install', 'Overview', 'Features', 'Screenshots', 'Demo', 'Ratings', 'Reviews', and 'Import'. The main text describes WordPress as web software for creating websites or blogs, noting it's free and open source. It mentions that over 60 million people use it and that it's an open source project with a large community. At the bottom, there are links for 'Install Now' and 'My Apps'.
